Appln. No. 10/542,553 Reply dated December 5, 2008 Reply to Office Action of October 6, 2008

Amendments to the Abstract

Please amend the Abstract of the Disclosure as follows:

The <u>invention relates to a disclosed</u> rotary machine <u>comprising includes</u> a rotor (6) bearing a packing (9) in the form of a ring which is at least partially made from a flexible, fluid-permeable material. The <u>inventive</u> machine also <u>comprises includes</u> variable-speed drive <u>means device</u> for rotating the rotor (6) and <u>means a device</u> which enable the aforementioned packing (9) to be deformed in response to a variation in the rotational speed of the rotor (6). As a result, the machine can produce an air flow, extract material contained in said flow and perform a self-cleaning cycle.
